THE paver-shield™ DIFFERENCE

Our patented process is not a sealant and features a smooth, ultra dense surface and rich vibrant color guaranteed not to fade!

3

During this process, iron oxide bonds with cement molecules resulting in the most vibrant color seen throughout each paver.

4

Once our base mix is created, ultra-fine sand, Portland cement and additional color come together to create our paver-shield technology!

5

paver-shield™ gives pavers a tight, smooth surface texture that will not expose heavy aggregate.

2

During our unique, state-of-the-art manufacturing process all of our quality materials are precisely measured out to create a consistent, extremely durable base mix which is the foundation of every Nicolock paver.

6

The final result is the very best in color, strength and beauty that will last for generations!

1

Nicolock sources the highest class of raw material in the industry to give each paver the very best in quality and consistency.

7

paver-shield™ is not a sealer like other manufacturers recommend, it's built into the manufacturing process for optimal durability.

paver-shield™ Technology
Tight, smooth surface texture that is built into the paver, not a sealer like other manufacturers.

Ultra dense base mix featuring color throughout the paver ensuring a lifetime of beauty.

NICOLOCK

paver-**shield**™

An investment to last a lifetime.

WITHOUT Nicolock paver-**shield**™

As pavers without paver-**shield**™ wear, the thin veneer and color tint exposes aggregate over time making them appear faded.

WITH Nicolock paver-**shield**™

Pavers with paver-**shield**™ have a tight, smooth surface texture and will not expose heavy aggregate as they wear.

Ultra-dense surface has more color and more protection. Nicolock has color from top to bottom throughout the paver ensuring a lifetime of beauty. Iron oxide pigments are GUARANTEED not to fade!

The color illustrations in this book are as accurate as photography and printing processes allow. Final selection of colors should be made from several physical samples. Shade variations are inherent in colored concrete products using natural materials. Delivered product can vary slightly from physical samples.

Color descriptions denoted in **Yellow** utilize Nicolock's unique colors and blends.

ADOBE BLEND

A two color blend of Chamois and Charcoal

Using advanced design fundamentals to **CREATE A STRIKING VISUAL OUTDOOR SPACE**

Nicolock has everything you need to create the “**WOW**” factor when you’re designing your outdoor space. Whether it’s a new patio, poolscape, driveway, or any other outdoor project, our design fundamentals make it easy to create a customized look that complements your particular style and taste. It all begins with color. Choose from our vast collection of rich, artisan colors. Then, get creative with our different-shaped paving stones and paver laying pattern options. Check out a few examples of popular laying patterns on the next few pages-- or mix and match to create your own unique design.

90° traditional

PAVER DIRECTION

Go from a traditional installation to an exceptional look by laying pavers at a 45° angle to create the illusion of space.

45° with border

BORDERS

Borders define edges and softly combine large areas that would otherwise be toneless. Monochromatic or contrasting colors help define your style.

45° with inlay

INLAYS

Inlays allow you to define an area within your outdoor space. Often created with contrasting colors and textures, inlays add visual interest to make your space pop.

**All layouts shown in Stone Ridge Granite City Blend*
